| Date | 23-09-2026 |
| Project Name | **Medical Diagnosis Centre by Service Portal (ServiceNow)** |
| Maximum Marks | 4 Marks |

**1. Brainstorming**

The brainstorming phase focused on identifying common challenges in managing medical diagnostic services. The main issues identified were manual patient registration, difficulty in requesting diagnostic tests, delays in processing requests, lack of request visibility, difficulty accessing laboratory reports, and repetitive work for medical and administrative staff.

The team explored how ServiceNow Service Portal could be used to provide a centralized, user-friendly, and automated solution for managing diagnostic test requests and laboratory reports.

**2. Idea Generation**

| Idea No. | Description |
|---|---|
| **1. Medical Diagnostic Test Management** | Manage the complete lifecycle of medical diagnostic test requests using ServiceNow. |
| **2. Self-Service Medical Diagnosis Portal** | Allow patients/users to access diagnostic services and submit test requests through a centralized Service Portal. |
| **3. Automated Diagnostic Request Processing** | Automate the processing of diagnostic requests after they are submitted through the portal. |
| **4. Patient & Diagnostic Record Management** | Maintain centralized records for patients, diagnostic tests, test requests, and laboratory reports. |
| **5. Laboratory Report Management** | Provide a structured way to manage and access diagnostic laboratory reports. |

| | |
|---|---|
| **6. Diagnostic Tracking & Reporting** | Provide visibility into test requests, their status, completed tests, and available reports through reports and dashboards. |

### 3. Idea Prioritization

The ideas were prioritized based on **business value, feasibility, automation potential, user convenience, and implementation effort**.

| Idea | Business Value | Feasibility | Priority |
|---|---|---|---|
| **Medical Diagnostic Test Management** | High | High | **1 – Highest** |
| **Self-Service Medical Diagnosis Portal** | High | High | **2** |
| **Automated Diagnostic Request Processing** | High | High | **3** |
| **Patient & Diagnostic Record Management** | High | High | **4** |
| **Laboratory Report Management** | High | High | **5** |
| **Diagnostic Tracking & Reporting** | Medium | High | **6** |

### 4. Selected Idea

**Medical Diagnosis Center by Service Portal (ServiceNow)** was selected as the final idea because it combines self-service diagnostic test requests, centralized patient and diagnostic records, automated request processing, laboratory report management, and request tracking into a single solution.

The proposed system uses **ServiceNow Service Portal** to provide users with an easy-to-use interface for accessing diagnostic services and submitting test requests. ServiceNow tables are used to maintain patient, diagnostic test, request, and laboratory report information, while automation helps reduce repetitive manual activities.

The solution addresses common challenges in traditional diagnostic center management by providing a **centralized, organized, user-friendly, and automated platform** for managing medical diagnostic services.
